Annual Financial Statements for the year ended June 30,2010

Index

The reports and statements set out below comprise the following:

Index	Page
Accounting Officers' Responsibilities and Approval	4
Statement of Financial Position on 30 June 2009	5
Statement of Financial Performance	6
Statement of Changes in Net Assets	7
Cash Flow Statement	8
Accounting Policies	9-22
Notes to the annual Financial Statements	23-40

The following supplementary information does not form part of the annual financial statements and is unaudited:

Appendix A	41
Appendix B	42-43
Appendix C	44
Appendix D	45-47
Appendix E1	48-49
Appendix E2	50-51
Appendix F	52

Metsimaholo Local Municipality

Annual Financial Statements for the year ended June 30, 2010

Accounting Officers' Responsibilities and Approval

The Accounting Officer is required by the Metsimaholo Local Municipality, a Grade 9 Local Authority in terms of item IV of Government Notice R999 of 2 October 2001, published in terms of the Remuneration of Public Office Bearers Act, 1998, to maintain adequate accounting records and is responsible for the content and integrity of the financial statements and related financial information included in this report. It is his responsibility to ensure that the financial statements fairly present the state of affairs of the Municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended, in conformity with Generally Recognised Accounting Practice (GRAP). The external auditors are engaged to express an independent opinion on the financial statements.

The financial statements are prepared in accordance with Generally Recognised Accounting Practice (GRAP) and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgments and estimates.

The Accounting Officer acknowledge that he is ultimately responsible for the system of internal financial control established by the council and place considerable importance on maintaining a strong control environment. To enable the Accounting Officer to meet these responsibilities, the council sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the Municipality and all employees are required to maintain the highest ethical standards in ensuring that the Municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the Municipality is on identifying, assessing, managing and monitoring all known forms of risk across the Municipality. While operating risk cannot be fully eliminated, the Municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The Accounting Officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

The Accounting Officer has reviewed the Municipality's cash flow forecast for the year to June 30, 2010 and, in the light of this review and the current financial position, he is satisfied that the Municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently reviewing and reporting on the Municipality's financial statements. The financial statements have been examined by the Municipality's external auditors and their report is presented from page 4

The financial statements set out on pages 5 to 52, which have been prepared on the going concern basis, were approved by the Municipal Manager and Chief Financial Officer on August 31, 2010 and were signed on its behalf by:

XW Msweli

Accounting Policies

1. Basis of preparation

The principal accounting policies adopted in the preparation of these financial statements are set out below.

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention, unless specifically stated otherwise.

The annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No. 56 of 2003).

Assets, liabilities, revenues and expenses have not been offset except where offsetting is required or permitted by a Standard of GRAP. Standard of GRAP.

The accounting policies are applied consistently with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant policy.

The standards included in the GRAP reporting framework, as determined in Directive 5 issued by the Accounting Standards Board, are summarised as follows:

Standard	Title of Standard
GRAP 1	Presentation of Financial Statements
GRAP 2	Cash Flow Statements
GRAP 3	Accounting Policies, Changes in Accounting Estimates and Errors
GRAP 4	The Effects of changes in Foreign Exchange Rates
GRAP 5	Borrowing Costs
GRAP 6	Consolidated and Separate Financial Statements
GRAP 7	Investments in Associate
GRAP 8	Interest in Joint Ventures
GRAP 9	Revenue from Exchange Transactions
GRAP 10	Financial Reporting in Hyperinflationary Economies
GRAP 11	Construction Contracts
GRAP 12	Inventories
GRAP 13	Leases
GRAP 14	Events after the reporting date
GRAP 16	Investment Property
GRAP 17	Property Plant and Equipment
GRAP 19	Provisions, Contingent Liabilities and Contingent Assets
GRAP 100	Non-current Assets held for Sale and Discontinued Operations
GRAP 101	Agriculture
GRAP 102	Intangible Assets
IFRS 3 (AC 140)	Business Combinations
IFRS 4 (AC 141)	Insurance Contracts
IFRS 6 (AC 143)	Exploration for and Evaluation of Mineral Resources
IFRS 7 (AC 144)	Financial Instruments: Disclosures
IAS 12 (AC 102)	Income Taxes
IAS 19 (AC 116)	Employee Benefits
IAS 32 (AC 125)	Financial Instruments: Presentation
IAS 36 (AC 128)	Impairment of Assets
IAS 39 (AC 133)	Financial Instruments: Recognition and Measurement

Accounting policies for material transactions, events or conditions not covered by the GRAP reporting framework, as detailed above, have been developed in accordance with paragraphs 7, 11 and 12 of GRAP 3 and the hierarchy approved in Directive 5 issued by the Accounting Standards Board.

STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE

The following standards, amendments to standards and interpretations have been issued but are not yet effective and have not been early adopted by the municipality.

Standard	Details of amendment and anticipated impact thereof	Annual periods beginning on or after
GRAP 18 - Segment Reporting	New standard of GRAP dealing with presentation and disclosure requirements in respect of segment reporting. Will require significant new disclosures	To be determined by the Minister of Finance (issued March 2005)
GRAP 21 - Impairment of Non-cash-generating Assets	New standard of GRAP dealing with the requirements around determining impairments of non-cash generating assets	To be determined by the Minister of Finance (issued March 2009)
GRAP 23 - Revenue from Non-exchange transactions	New standard of GRAP dealing with revenue from non-exchange transactions, including grant income, levies and taxes. This is likely to change the way that grants are accounted as the new standard eliminates the matching principal and focuses only on the conditions as a factor for determining the recognition of grant revenue.	To be determined by the Minister of Finance (issued February 2008)
GRAP 24 - Presentation of Budget Information in the Financial Statements	New standard of GRAP dealing with the presentation and disclosure of budget information as required by GRAP 1. The impact of this is currently being assessed by management as part of the work on assets.	To be determined by the Minister of Finance (issued November 2007)
GRAP 25 Employee benefits	New GRAP25 not applicable for 2009/2010. IAS 19 and IFRIC 14 applicable	
GRAP 26 - Cash-generating Assets	New standard of GRAP dealing with the requirements assets. The impact of this is currently being assessed by management as part of the work on assets.	To be determined by the Minister of Finance
GRAP 103 - Heritage Assets	New standard of GRAP dealing with the recognition, subsequent measurement, presentation and disclosure of heritage assets. The impact of this is currently being assessed by management as part of the work on assets	To be determined by the Minister of Finance (issued July 2008)
GRAP 104 Financial Instruments	GRAP 104 not applicable for 2009/2010. IAS32, IAS39, IFRS7 and IFRIC 2 and 9 applicable	
Amendment to IFRS 3 - Business Combinations	Amendments to accounting for business combinations. The municipality has not entered into any business combinations. As such it is anticipated that the amendment to the Standard will not have an impact on financial results of the municipality.	1 July 2009
* Amendment to IFRS 7 - Financial Instruments: Disclosures	Presentation of finance costs The amendment to the Standard enhances disclosure of finance costs. As such it is anticipated that the amendment to the Standard will not have an impact on financial results of the municipality.	1 January 2009
* Amendment to IAS 19 - Employee Benefits	The amendment affects the following: Curtailments and negative past service cost Plan administration costs Replacement of terms "fall due" Guidance on contingent liabilities	1 January 2009
Amendment to IAS 32 - Financial Instruments: Presentation	Certain financial instruments will be classified as equity whereas, prior to these amendments, they would have been classified as financial liabilities. The entity does not hold any instruments that are subject to the revised classification provisions of the Standard. As such it is anticipated that the amendment to the Standard will not have an impact on financial results of the municipality.	1 January 2009

* Amendment to IAS 36 - Impairment of Assets	Disclosure of estimates used to determine recoverable amount. The amendment to the Standard enhances disclosure of estimates applied in determining the recoverable amount. As such it is anticipated that the amendment to the Standard will not have an impact on financial results of the municipality.	1 January 2009
* Amendment to IAS 36 - Impairment of Assets	Unit of accounting for goodwill impairment test. The municipality has not entered into any transactions that give rise to goodwill. As such it is anticipated that the amendment to the Standard will not have an impact on financial results of the municipality.	1 January 2010
* Amendment to IAS 39 - Financial Instruments: Recognition and Measurement	Reclassification of derivatives into or out of the classification of at fair value through profit or loss. Designating and documenting hedges at the segment level. Applicable effective interest rate on cessation of fair value hedge accounting. The municipality does not have any derivative financial instruments or hedge instruments and does not apply hedge accounting. As such it is anticipated that the amendment to the Standard will not have an impact on financial results of the municipality.	1 January 2009
* Amendment to IAS 39 - Financial Instruments: Recognition and Measurement	Clarifies two hedge accounting issues: Inflation in a financial hedged item. A one-sided risk in a hedged item. The municipality does not apply hedge accounting. As such it is anticipated that the amendment to the Standard will not have an impact on financial results of the municipality.	1 July 2009
* Amendment to IAS 39 - Financial Instruments: Recognition and Measurement	Treating loan prepayment penalties as closely related embedded derivatives Scope exemption for business combination contracts Cash flow hedge accounting The municipality is not subject to any loan repayment penalties and it does not apply hedge accounting, as it does not have any hedge instruments. As such it is anticipated that the amendment to the Standard will not have an impact on financial results of the municipality.	1 January 2010
Interpretation** Annual periods beginning on or after		
* IFRIC 9 - Reassessment of Embedded Derivatives		1 July 2009
IFRIC 12 - Service Concession Arrangements		1 January 2008
IFRIC 13 - Customer Loyalty Programmes		1 July 2008
IFRIC 14 - IAS 19: The Limit on a Defined Benefit Asset, Minimum Funding requirements and their interaction		1 January 2008
IFRIC 15 - Agreements for the Construction of Real Estate		1 January 2009
IFRIC 16 - Hedges of a Net Investment in a Foreign Operation		1 October 2008
* IFRIC 16 - Hedges of a Net Investment in a Foreign Operation		1 July 2009
IFRIC 17 - Distribution of Non-cash Assets to Owners		1 July 2009

1.1 Significant judgements

In preparing the financial statements, management is required to make estimates and assumptions that affect the amounts presented in the financial statements and related disclosures. Use of available information and the application of judgement are inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the financial statements. Significant judgements include:

Loans and receivables

The Municipality assesses its loans and receivables for impairment at each balance sheet date. In determining whether an impairment loss should be recorded in the income statement, the company makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for loans and receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

Allowance for slow moving, damaged and obsolete stock

An allowance is made for slow-moving, damaged and obsolete inventory to write the inventory down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down, if any, is included in the Statement of Financial Performance.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available -for-sale securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the company is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over -the counter derivatives) is determined by using valuation techniques. The company uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using quoted forward exchange rates at the balance sheet date.

The fair value of financial instruments that are not traded in an active market (for example, over -the counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments.

Impairment testing

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that impairment (i.e. carrying amount is less than recoverable amount) may have occurred, estimates are prepared of expected future cash flows for each group of assets. The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values.

Post employment benefits

The present value of the post employment obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post employment obligations. The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high -quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 32.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Provisions

Provisions were raised and management determined an estimate based on the information available. Provisions are measured at the management's best estimate of the expenditure required to settle the obligation at the reporting date, and are discounted to present value where the effect is material.

Useful lives and residual values

The municipality re-assess the useful lives and residual values of property, plant and equipment on an annual basis. In re-assessing the useful lives and residual values of property, plant and equipment management considers the condition and use of the individual assets, to determine the remaining period over which the asset can and will be used.

Presentation currency

The financial statements are presented in South African Rand, which is the functional currency of the municipality, and are rounded off to the nearest Rand.

Going concern

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

Comparative concern

Budget information in accordance with GRAP 1 and based on IPSAS 24, has been provided in an annexure to these financial statements and does not form part of the audited annual financial statements.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.2 Property, plant and equipment

Property, plant and equipment is carried at cost, less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits associated with the item will flow to the municipality; and the cost of the item can be measured reliably.

Costs include costs (cash or cash price equivalent) incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. The cost of replacing or servicing an asset will only be included if the expenditure improves the condition of the asset beyond the most reasonably assessed standard of performance. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

An item of property, plant and equipment is eliminated from the statement of financial position on disposal or when the asset is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal. Any gains or losses arising from the de-recognition thereof are recognised in surplus / deficit, in the period that it arises.

Property, plant and equipment are carried at cost less accumulated depreciation and any accumulated impairment losses. The residual value and the useful life of each asset are reviewed annually. Where these estimates differ from those previously assessed the change is recognised as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item shall be depreciated separately over its estimated useful life. Those items of property, plant and equipment which are of such a nature that they are replaced as a whole and not in terms of component parts, are not broken down into significant components as the useful lives of the components are expected to approximate the useful lives of the items taken as a whole.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset. Depreciation is provided, using the straight line method, on all property, plant and equipment to write down their cost over their estimated useful lives to their estimated residual values. Where the residual value of an asset item is considered to be insignificant it is also considered to be immaterial in the calculation of the depreciable amount of those assets.

Depreciation is provided as follows:

Item	Average useful life
Roads	10 - 30 years
Electricity	20 - 30 years
Water	15 - 20 years
Sewerage	15 - 20 years
Housing	30 years
Buildings	30 years
Recreational facilities	20 - 30 years
Specialist vehicles	10 years
Other vehicles	3 - 20 years
Office equipment	3 - 5 years
Furniture and fittings	3 - 7 years
Bins and containers	5 - 10 years
Specialised plant and equipment	5 - 15 years
Other items of plant and equipment	2 - 5 years

The surpluses or deficits arising from de-recognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised.

Donated assets and assets obtained at less than fair value are accounted for at fair value. Donated assets are recognised when either available for use or when the risks and rewards of ownership have transferred. The difference between the fair value and the cash consideration is accounted for using the accounting policy relating to the accounting of non-exchange revenue.

Land is not depreciated.

Depreciation commences when the assets are ready for their intended use.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

Non-current assets (or disposal group) held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets (or disposal group) held for sale, are measured at the lower of its carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

Impairment testing

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

An impairment loss is recognised for cash-generating units if the recoverable amount of the unit is less than the carrying amount of the units. The impairment loss is allocated to reduce the carrying amount of the assets. The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

1.3 Financial instruments

Initial recognition and measurement

Financial instruments are recognised initially when the municipality becomes a party to the contractual provisions of the instruments.

The municipality classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

Subsequent measurement

Financial Assets are categorised according to their nature as either financial assets at fair value through profit or loss, held-to maturity, loans and receivables, or available for sale. Financial liabilities are categorised as either at fair value through profit or loss or financial liabilities carried at amortised cost ("other"). The subsequent measurement of financial assets and liabilities depends on this categorisation and, in the absence of an approved GRAP Standard on Financial Instruments, is in accordance with IAS 39.

Fair value determination

Fair value information for trade and other receivables and payables are determined as the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

Loans to employees

These financial assets are classified as loans and receivables and are measured at fair value plus direct transaction costs upon initial recognition.

After initial recognition these loans are measured at amortised cost, using the effective interest rate method, less any impairment loss recognised to reflect irrecoverable amounts.

An impairment loss is recognised in surplus or deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the loan's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

Impairment losses are reversed in subsequent periods when an increase in the loan's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to the restriction that the carrying amount of the investment at the date the impairment is reversed shall not exceed what the amortised cost would have been had the impairment not been recognised.

Trade and other receivables

Trade receivables classified as loans and receivables and are measured at initial recognition at fair value plus direct transaction costs. After initial recognition these receivables are measured at amortised cost, using the effective interest rate method, less any impairment loss recognised to reflect irrecoverable amounts..

Appropriate allowances for estimated irrecoverable amounts are recognised in surplus or deficit when there is objective evidence that the receivable is impaired. Significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the receivable's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

The carrying amount of the receivable is reduced through the use of an allowance account, and the amount of the deficit is recognised in the Statement of Financial Performance within operating expenses. When a trade receivable is uncollectable, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against other income in the Statement of Financial Performance.

Trade and other payables

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Trade and other payables are classified as financial liabilities carried at amortised cost.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits and are subject to an insignificant risk of changes in value. These are initially recorded at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Cash and cash equivalents are classified as loans and receivables.

Bank overdraft and borrowings

Bank overdrafts and borrowings are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in accordance with the municipality's accounting policy for borrowing costs.

Other financial liabilities are measured initially at fair value and subsequently at amortised cost, using the effective interest rate method.

Bank overdraft and borrowings are classified as financial liabilities carried at amortised cost.

Other loans and receivables

Other financial assets classified as loans and receivables are initially recognised at fair value plus transaction costs, and are subsequently carried at amortised cost less any accumulated impairment.

These financial assets are not quoted in an active market and have fixed or determinable payments.

Designated through profit and loss

These financial assets are measured at fair value.

Impairment

At reporting date, the Municipality determines whether there is any objective evidence that a financial asset or group of financial assets is impaired.

If there is objective evidence that an impairment loss on loans and receivables or held-to-maturity investments carried at amortised cost has been incurred, the amount of the deficit is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit deficits that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition).

The carrying amount of the asset is reduced either directly or through use of an allowance account. The amount of the deficit is recognised in surplus or deficit.

If there is objective evidence that an impairment loss has been incurred on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and is settled by delivery of such an unquoted equity instrument, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows, discounted at the current market rate of return for a similar financial asset to the financial asset that is impaired. Such impairment losses are not reversed.

When a decline in the fair value of an available-for-sale financial asset has been recognised directly in net assets and there is objective evidence that the asset is impaired, the cumulative deficit that had been recognised directly in net assets shall be removed and recognised in surplus or deficit even though the financial asset has not been derecognised.

The amount of the cumulative deficit that is removed from equity and recognised in surplus or deficit are the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognised in surplus or deficit.

1.4 Inventories

Initial recognition:.

Inventories are measured at the lower of cost and net realisable value, except where the paragraph mentioned below applies.

Where inventories are held for:

- consumption in the production process of goods to be distributed at no charge or for a nominal charge, these inventories are held at net realisable

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs

The following cost formulas are applied for every inventory class:

Inventory class:	Measure
Consumable stores	First-in-first-out
Water	Weighted
Unsold houses	First-in-first-out

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all deficits of inventories are recognised as an expense in the period the write-down or deficit occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

The basis of allocating cost to inventory items is the weighted average method.

1.5 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Finance leases - lessor

The municipality recognises finance lease receivables on the Statement of Financial Position at the commencement of the lease term. The finance lease receivable is measured at an amount equal to the net investment in the lease upon initial recognition.

Finance income is recognised based on a pattern reflecting a constant periodic rate of return on the municipality's net investment in the finance lease.

Municipality as lessee

The following situations would normally individually or in combination lead to a lease being classified as a finance lease and have been considered by the municipality:

- lease transfers ownership of the asset to the lessee by the end to the lease term;
- the lessee has the option to purchase the asset at a price that is expected to be sufficiently lower than the fair value at the date the option becomes exercisable for it to be reasonably certain, at inception of the lease, that the option will be exercised;
- the lease term is for the major part of the economic life of the asset even if title is not transferred
- at the inception of the lease the present value of the minimum lease payments amounts to at least substantially all of the fair value of the asset;
- the leased asset is of such a specialised nature that only the lessee can use them without major modification;
- if the lessee can cancel the lease, the lessor's deficits associated with the cancellation are born by the lessee;
- gains or deficits from the fluctuation in the fair value of the residual accrue to the lessee; and
- the lessee has the ability to continue the lease for a secondary period at a rent that is substantial lower than market rent.

Finance leases are recognised as assets and liabilities in the Statement of Financial Position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments, at the commencement of the lease term. The corresponding liability to the lessor is included in the Statement of Financial Position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

The lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets, or where shorter, the term of the relevant lease.

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset. The classification of the lease is determined using GRAP 13 Leases.

Operating leases - lessor

Operating lease income is recognised as an income on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease income.

Income for leases is disclosed as a separate line item in the Statement of Financial Performance. Contingent rentals received / receivable are recognised in income in the period when they become due and are not included in the straight-line lease income.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset. This liability is not discounted.

Any contingent rents are expensed in the period they are incurred and are not included in the straight-line lease expense.

1.6 Intangible assets

Initial recognition

Metsimaholo Local Municipality classifies assets that are non-monetary without physical substance as intangible assets. When software is not an integral part of the related hardware, computer software is treated as an intangible asset; otherwise it is treated as property, plant and equipment.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits that are attributable to the asset will flow to the municipality; and
- the cost of the asset can be measured reliably.

Intangible assets are measured at cost upon initial recognition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred. An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale;
- there is an intention to complete and use or sell it;
- there is an ability to use or sell it;
- it will generate probable future economic benefits;
- there are available technical, financial and other resources to complete the development and to use or sell the asset; and
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses. Amortisation commences when the asset is available for use and ceases at the earlier of the disposal of the asset or when the residual value of the asset is equal to or exceeds the carrying value of the asset.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date. Reassessing the useful life of an intangible asset with a definite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

An item of intangible assets shall be eliminated from the statement of financial position on disposal or when the asset is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal. Gains or losses arising from the disposal are recognised in surplus / (deficit) for the period during which the asset is disposed.

The residual value and the useful life of each asset are reviewed annually.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software	3 years

1.7 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of profit sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

Defined contribution plans

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution plan.

Defined benefit plans

For defined benefit plans the cost of providing the benefits is determined using the projected unit credit method. Actuarial valuations are conducted on a regular basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to reporting date where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight line basis over the average period until the amended benefits become vested.

To the extent that, at the beginning of the financial period, any cumulative unrecognised actuarial gain or deficit exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognised in the Statement of Financial Performance over the expected average remaining service lives of participating employees. Actuarial gains or deficits within the corridor are not recognised.

Gains or deficits on the curtailment or settlement of a defined benefit plan are recognised when the municipality is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset.

The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In the Statement of Financial Performance, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the Statement of Financial Position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and deficits and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to un-recognised actuarial deficits, plus the present value of available refunds and reduction in future contributions to the plan. For defined benefit plans the cost of providing the benefits is determined using the projected unit credit method. Actuarial valuations are conducted on a regular basis by independent actuaries separately for each plan. Consideration is given to any event that could impact the funds up to reporting date where the interim valuation is performed at an earlier date.

Multi-employer plans

A multi-employer plan is classified as either a defined benefit plan or a defined contribution plan. If the plan is a defined benefit plan, an actuarial valuation should be obtained. Normal defined benefit accounting would be applied to the proportionate share of the obligation and assets relating to the municipality. If actuaries are unable to provide the municipality with an actuarial valuation, the municipality accounts for the plan as if it were a defined contribution plan.

1.8 Government grants

Government grants are recognised when there is reasonable assurance that:

- the entity will comply with the conditions attaching to them; and
- the grants will be received.

1.9 Investments Held to Maturity

All Sanlam investments are classified as held to maturity investments as all are non derivative financial assets with fixed or determinable payments and fixed maturity.

The municipality has the positive intention and ability to hold these policies to maturity.

1.10 Impairment of assets

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An impairment loss is recognised for cash-generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

- to the assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.

A municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

1.11 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the present value of the expenditure expected to be required to settle the obligation. Where the effect of time value of money is material, the amount of a provision shall be the present value of the expenditure expected to be required to settle the obligation.

The Municipality uses a pre-tax rate that reflects current market assessments of the time value of money and the risks for which future cash flow estimates have been adjusted.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement shall be recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement shall be treated as a separate asset. The amount recognised for the reimbursement shall not exceed the amount of the provision.

Provisions are not recognised for future operating deficits.

If a municipality has a contract that is onerous, the present obligation under the contract shall be recognised and measured as a provision.

A constructive obligation to restructure arises only when the municipality:

- has a detailed formal plan for the restructuring, identifying at least:
 - the business or part of a business concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for terminating their services;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

After their initial recognition contingent liabilities recognised in business combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the annual financial statements.

1.12 Revenue

Revenue from exchange transactions:

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Service charges relating to electricity and water are based on consumption. Meters are read on a quarterly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the recorded number of refuse containers per property.

Service charges from sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved from Council and are levied monthly.

Interest revenue is recognised on a time proportion basis.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease .

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licences and permits.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods is passed to the consumer.

Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of agency fee or commission payable to the municipality as compensation for executing the agreed services.

Revenue from non - exchange transactions:

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non -exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportionate basis.

Fines constitute both spot fines and summonses. Revenue from spot fines and summonses is recognised when payment is received, together with an estimate of spot fines and summonses that will be received based on past experience of amounts collected.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, a deferred income (liability) is recognised.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

Grants, transfers and donations:

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

1.13 Borrowing costs

Borrowing costs are recognised as an expense in the period in which they are incurred, unless the borrowing cost was incurred in relation to a qualifying asset in which case the borrowing cost is capitalized in the cost of such an asset.

1.14 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.15 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.16 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised.

1.17 Investment in joint ventures

An investment in a joint venture is carried at fair value and classified as fair value through profit or loss.

Profits and losses resulting from contributions or sale of assets to joint ventures are only recognised to the extent of other venturers' interests in the joint venture.

The group's share of profits or losses, resulting from purchase of assets from joint ventures are recognised only when the assets are resold to an independent party.

In respect of its interests in jointly controlled operations, the municipality recognises in its :

- the assets that it controls and the liabilities that it incurs; and

- the expenses that it incurs and its share of the income that it earns from the sale of goods or services by the joint venture.

In respect of its interest in jointly controlled assets, the municipality recognises in its :

- its share of the jointly controlled assets, classified according to the nature of the assets;
- any liabilities that it has incurred;
- its share of any liabilities incurred jointly with the other venturers in relation to the joint venture;
- any income from the sale or use of its share of the output of the joint venture, together with its share of any expenses incurred by the joint venture; and
- any expenses that it has incurred in respect of its interest in the joint venture.

1.22 Going concern

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

1.23 Related parties

The municipality operates in an economic environment currently dominated by entities directly or indirectly owned by the South African government. All national departments of government and state-controlled entities are regarded as related parties in accordance with Circular 4 of 2005: Guidance on the term "state controlled entities" in context of IAS 24 (AC 126) - Related Parties, issued by the South African Institute of Chartered Accountants. Other related party transactions are also disclosed in terms of the requirements of the accounting standard

Credit quality of service receivables

All of municipality's trade and other receivables have been reviewed for indicators of impairment. The municipality's management considers that all of the above financial assets that are not impaired for each of the reporting dates under review are of good credit quality. The municipality continuously monitors consumers, identified group, based on average past payment history and incorporates this information into its credit risk control. No external credit rating is performed.

5. Long-term receivables

Staff housing loans

The loans were discontinued, see section 164 of MFMA. The instances below happened before implementation of the MFMA.

The loan was granted to a staff member in 1984 at an interest rate of 5%.

The loan will be fully redeemed in 2014.

Car loans

The loan was granted to a staff member at 8.5% interest. The member has passed away. The balance is to be settled as part of the estate. A claim has been submitted to ABSA.

Housing selling scheme loans

Housing loans RDP

Loans are granted for the purchase of the land (stands).

138 992	338 991

The municipality has not reclassified any financial assets from cost or amortised cost to fair value, or from fair value to cost or amortised cost during the current or prior year.

There were no gains or losses realised on the disposal of held to maturity financial assets in 2010 and 2009, as all the financial assets were disposed of at their redemption date.

Consumer debtors made arrangements to repay the debt over a period exceeding 12 months.

Due to insufficient information available on the system, it is not practical to identify the debt portion repayable beyond 12 months.

An amount of R73.7 million was included in AFS note 3. These are amounts due for more than 90 days and were already impaired.

Current liabilities	6 501 780	5 380 057
	11 036 653	16 418 411

It is municipality policy to lease certain equipment under finance leases.

The average lease term is 2-5 years and the average effective borrowing rate is 11.91%. Interest rates are fixed at the contract date. Some leases have fixed repayment terms and other escalate between 10%-15% per annum. No arrangements have been entered into for contingent rent. Obligations under finance leases are secured by the lessor's title to the leased asset.

The municipality's obligations under finance leases are secured by the lessor's charge over the leased assets. Refer note 8.

31. Commitments**Capital Commitments****Already contracted for but not provided for**

□ Infrastructure	34 910 670	25 339 155
This expenditure will be financed from:		
- Government grants	34 910 670	25 339 155

Operating leases - lessee (Abrahamsrust)

Minimum lease payments due		
- within one year	1	1
- in second to fifth year inclusive	5	5
- later than five years	1	2
	7	8

Operating lease payments represent rentals payable by the entity for rental of property situated on Abrahamsrust.

The entity has a 50 year lease option that expires on 31 March 2017.

32. Retirement benefits**Defined contribution plan**

The following are defined contribution plans: Municipal Councillors Pension Fund, Free State Municipal Pension Fund, Free State Municipal Provident Fund and SAMWU Provident Fund. Employees can contribute to the Free State Municipal Pension Fund, Free State Municipal Provident Fund and SAMWU Provident Fund. These Funds are classified as defined contribution plans. These contributions have been expensed.

Defined benefit plan

The defined benefit plans are the SALA Pension Fund and the Government Employment Pension Fund. These are not treated as defined benefit plans as defined by IAS19 (AC 116), but as a defined contribution plans. According to the actuaries it is not possible to report separately for each municipality on the fund, thus the reason for treating them as defined contribution plans in terms of IAS 19 (AC116) par. 30.

Some employees of various municipalities belongs to the SALA Pension Fund. The latest actuarial valuation of SALA Pension Fund was on 1 July 2007. These valuations indicate that the funds are in a sound financial position. The estimated liability of the fund is R5,580.30 million which adequately financed by assets of R6,138.70 million.

Some employees of various municipalities belongs to the Government Employment Pension Fund. The latest actuarial valuation of Government Employment Pension Fund was on 31 March 2006. These valuations indicate that the funds are in a sound financial position. The estimated liability of the fund is R447,474 million which adequately financed by assets of R545,563 million.

37. Comparative figures

Certain comparative figures have been reclassified for fairer presentation of the information due to prior period errors. Refer to note 38 for prior period errors.

38. Prior period errors

- 1) The opening balance of the water stock was adjusted with R66 849 as a result of the new engineers report.
- 2) The amount of R1 007 981, Ukwasi Force, in note 36 is replace with R1 411 443.
- 3) The general ledger was corrected to the debtors age analysis.
- 4) DWAF unspent grants was corrected with capital expenditure.
- 5) Funds received from DWAF corrected that was allocated to the wrong vote.
- 6) The Vat on provision on Bad Debts was corrected.
- 7) Payments in advance is corrected.

The correction of these errors results in adjustments for the 2009 year as set out below:

40. Risk management**Capital risk management****Liquidity risk**

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality's manages liquidity risk through an ongoing review of future commitment, investments and credit facilities.

Cash flow forecasts are prepared monthly and adequate utilised borrowing facilities are monitored.

The Council has a R 5 million overdraft facility with ABSA Bank to ensure adequate borrowing facilities are available. The cash flow of the Council is managed on a daily basis and any problems are communicated to the management and members of the Mayoral Committee in time to ensure arrangements with major suppliers can be reached. The situation was managed and Council took drastic action to improve the matter.

A Budget and Loss Control Committee was established to ensure proper management of the cash flow and budget.

A data cleansing project is in the process to improve the liquidity of the Municipality.

The Revenue Enhancement Strategy was approved by Council and currently being implemented..

The general liquidity of the Council is managed by a bank and investment policy with properly defined duties and responsibilities supported by adequate delegated authority by the Council.

The exposure of Council's risk to liquidity are due to the non payment of receivables. There are insufficient consumer deposits to cover outstanding trade receivables. These will be address through the data cleansing exercise

The Council has the following financial instruments that can be cashed in on a very short notice to relieve cash flow matters that cannot be addressed in the normal course of business.

-Paid up annuity

-Shares Sanlam Ltd

-Non paid up annuity

-Approved additional credit facility available

In terms of Section 137 and 139 of the Municipal Financial Management Act,(Act no 56 of 2003) provision is made for provincial intervention when serious financial problems are experienced.

The above instruments are available if the current funds are not enough to cover the future commitments and are sufficient to cover any normal liquidity risk of the Council.

The Council is empowered to perform tariff adjustments and budget for any unforeseen operational changes in the nature of the Council's business subject to applicable regulations.

The table below analyses the municipality's's financial liabilities and net -settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Risk from environmental assets

The Council is not exposed to financial risks arising from changes in any purchased biological bulk services.

The Council operates two water purification plants as well as two sewer purification plants in Oranjeville and Deneysville which is considered an ecologically sensitive and national key resource area. (upper and lower Vaal Dam).

The Council has established a disaster management committee and forum to ensure any disaster can be managed.

The main bulk services for the area is purchased and these resources are negotiated through a national negotiation forum that ensures that bulk service purchase price increases are fair. The sewer purification for the Sasolburg and Zamdela services is purchased from SASOL group. The annual price increase is forwarded to the consumers to ensure that financial risks is managed. No joint or separate responsibility for sewer outfall exists on the Sasolburg and Zamdela plant.

The Council reviews its water and sewer purification prices annually, considering the need for active financial risk management.

The Council operates seven cemeteries. The Council is in process to procure adequate land for these cemeteries to ensure the major financial risk relating to cemeteries are catered for.

The Council operates three demarcated refuse removal sites. The operation of these sites are considered adequate and current studies are underway to ensure that the sustainability, operation and rehabilitation of these sites are adequate. These studies will ensure that adequate financial risks is identified and managed.

The financial risk for storm water is managed through the non acceptance of any risk for down flow storm water in title deeds and the inclusion of operational and financial risk controls in the title deeds of all stands and the town planning scheme.

Adequate (R100 million) public liability insurance is secured annually from the insurers of the Council.

The recoverability of long-term debtors, with a carrying value of R542 940, are considered to be irrecoverable and adequately provided for.

Interest rate risk

At reporting date the interest rate profile of the municipality's interest bearing financial instruments was:

Fixed rate instruments

Financial Assets: R 29 469 381 (2009: R 8 073 891)

Financial Liabilities: R Nil (2009:R Nil)

Variable rate instruments

Financial Assets: R 6 655 005 (2009: R 6 218 208)

Financial Liabilities: R11 036 653(2009: R 16 513 423)

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the group to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk. During 2010 and 2009, the municipality's borrowings at variable rate were denominated in the Rand.

Metsimaholo Local Municipality

Annual Financial Statements for the year ended June 30, 2010

Notes to the

Figures in Rand

2 010**2 009****Credit risk**

Credit risk consists mainly of cash deposits, cash equivalents and trade receivables. The Council only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party. Only approved major financial institutions are utilised. An extensive investment policy and delegated authority is approved by Council and is adhered to.

Minimal cash on hand is kept in the form of receipts and cashier floats. The income is daily collected by a collection service and sufficient categories of safes and strong rooms are utilised to keep cash until collection. There is security services at the building.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. The collection of arrears is a priority. The credit control and debt collection policy is reviewed annually to ensure the credit risk is managed. The Council budgets for adequate working capital and a bad debt write off policy is being developed.

Deposits are levied with new connections. The indigent register is regularly reviewed and updated. A credit collection section is functioning and any arrear accounts duly followed up. Action is taken timeously against defaulters. Proceeds of the sale of property is attached for amounts owed during the transfer of properties by issuing clearance certificates as required.

Cash, fidelity and money handlers insurance are taken out annually to ensure adequate risk cover exist.

44. Change in estimate

Property, plant and equipment

The useful life of certain property, plant and equipment was re-assessed during the year. The effect of this revision has decreased the depreciation charges for the current and future periods by R 446,983

45. Going concern

The municipality is experiencing cash flow problems as a result of not being able to collect outstanding trade debtors. This results in trade payables not being paid on time. The municipality relies on government funds to sustain its cash flow.

46. Income foregone

The income foregone relates to rebates granted to consumers on services rendered.

Problems are experienced with the asset register to be in line with GAMAP.

1. Depreciation is done with implementation of Asset Register, but further adjustments will be made to correct depreciation on the assets taken up
2. Loans redeemed and other capital receipts were allocated to accumulated depreciation, as well as loan redemption fund.

	10 690 831	(15 082 340)	25 773 171		
Net surplus / (deficit) for the year	-	-	-	-	

Explanation of Significant Variance greater than 10% Versus Budget

1 TARIFF CHARGES

Fewer services such as dump yard refuse where rendered.

2 FINES

Envisaged planning of expanding the traffic department's operations did not materialize due to cash constraints.

3 INTEREST EARNED - External investment

Grants from DME that was invested resulted in more interest due to the fact that projects were not concluded in the year of review and will be rolled over.

4 INTEREST EARNED - OUTSTANDING DEBTORS

Outstanding receivables increased.

5 RENTAL FACILITIES AND EQUIPMENT

Hostel charges of Thembaletu previously rented by Sasol took effect during the year under review.

6 LICENSES AND PERMITS

Fewer traders applied and received licences than anticipated.

7 PROFITS ON SALE OF ASSETS

Sale of erven was limited to RDP housing (Housing fund).
A moratorium on the selling of land was enforced during the year under review.

8 OTHER INCOME

Control measures were put in place and this assisted that more income were realised than anticipated.

9 CAPITAL GRANTS AND SUBSIDIES - Operating Budget

Offset Depreciation is allocated from accumulated surplus.
Funds were unbundled as a result of the GRAP implementation. It should be noted that the budget excess is not actual expenditure but rather accounting entries passed.

10 FORGONE INCOME

Fewer pensioners applied for rebates on rates than what was anticipated.

11 BAD DEBTS

The variance is as a result of accounting entries past in line with GRAP requirements. It is not actual expenditure.

12 DEPRECIATION

Useful life of certain of the assets reached their full depreciation amount during the year of review.
The variance was caused by the finalisation of the infrastructure asset register, which could not be completed in the financial year under review.

13 REPAIRS AND MAINTENANCE

The variance was as a result of delay experienced in appointing service providers.
It should however be noted that the expenditure increased from 2009 to 2010 financial year.

14 INTEREST ON BORROWINGS

The envisaged loan to be taken up did not materialise.
No response was received from the main banks on the tender advertised.

15 BULK PURCHASES

The reticulation networks did not expand as envisaged. There was also a decrease in the water demand from our big consumers (industries), so less water was bought than originally anticipated.

16 **CONTRACTED SERVICES**

Fewer shows were done at the theatre than anticipated.

17 **GENERAL EXPENSES**

Better controls were implemented, therefore a decrease in the expenditure from 2009 financial year.
The establishment of the Budget and Loss Control Committee contribute here to.

18 **PROVISIONS**

Implementation of GRAP
It is only accounting entries.

METSIMAHOLO LOCAL MUNICIPALITY
Explanation of Significant Variance greater than 5% Versus Budget

The envisage loan to be taken up did not materialised. No response was received from financial main banks on proposals for financing.

The process of acquiring landfill sites took longer than anticipated. Anglo Coal has since committed to funding the EIA study in the 2010/2011 financial year.

Projects financed from Department of Mineral and Energy Affairs were not completed and funding will be rolled over for 2010 – 2011 financial year.

The introduction of control measures such as the Budget and Loss Control Committee has assisted in curbing unnecessary spending.. Departments need to motivate their needs and expenditure can only happens when the necessary approval is granted by the Committee.

METSIMAHOLO LOCAL MUNICIPALITY
